
Frontend Developer (React.js)

About the Role: Join our creative team to build beautiful, responsive, and user-friendly web interfaces. **Responsibilities:**

- Develop user-facing features using React.js and modern JavaScript (ES6+).
- Translate UI/UX design wireframes into high-quality, reusable code.
- Optimize web applications for maximum speed and scalability across devices.

Requirements:

- 2+ years of experience with React.js, Redux, and Context API.
- Proficiency in HTML5, CSS3, and Tailwind CSS or SCSS.
- Familiarity with RESTful APIs and modern frontend build pipelines (Webpack, Vite).
