
DevOps/SRE Engineer

About the Role: Ensure our cloud infrastructure is reliable, scalable, and secure.

Responsibilities:

- Automate CI/CD pipelines using GitHub Actions or Jenkins.
- Provision and manage cloud infrastructure using Infrastructure as Code (Terraform).
- Monitor system performance and troubleshoot production incidents. **Requirements:**
- 3+ years of experience in Linux administration and AWS/GCP ecosystems.
- Deep expertise in containerization (Docker) and orchestration (Kubernetes).
- Strong scripting skills in Bash or Python.
