
Cloud Solutions Architect (Azure)

About the Role: Design scalable enterprise cloud architectures for our enterprise clients.

Responsibilities:

- Evaluate existing systems and design cloud migration strategies.
- Architect secure, highly available, and cost-effective solutions on Microsoft Azure.
- Act as a technical bridge between business stakeholders and engineering teams.

Requirements:

- 5+ years of experience in cloud computing and enterprise architecture.
- Deep knowledge of Azure Active Directory, Azure SQL, and serverless computing.
- Microsoft Certified: Azure Solutions Architect Expert certification is highly preferred.
