
QA Automation Engineer

About the Role: Ensure the highest quality of our software releases through rigorous automated testing. **Responsibilities:**

- Design, develop, and execute automated test scripts for web and mobile applications.
- Integrate automated testing frameworks into the CI/CD pipeline.
- Log, track, and verify bug fixes using Jira. **Requirements:**
- 2+ years of experience with automation tools like Selenium, Cypress, or Playwright.
- Proficiency in programming languages such as Java, Python, or JavaScript for scripting.
- Solid understanding of QA methodologies and the software development life cycle.
